

# ACCESS MANAGEMENT PRINCIPLES AND TECHNIQUES

## Cañon City US 50 Access Control Plan

### Consolidate Direct Access to Major Roadways

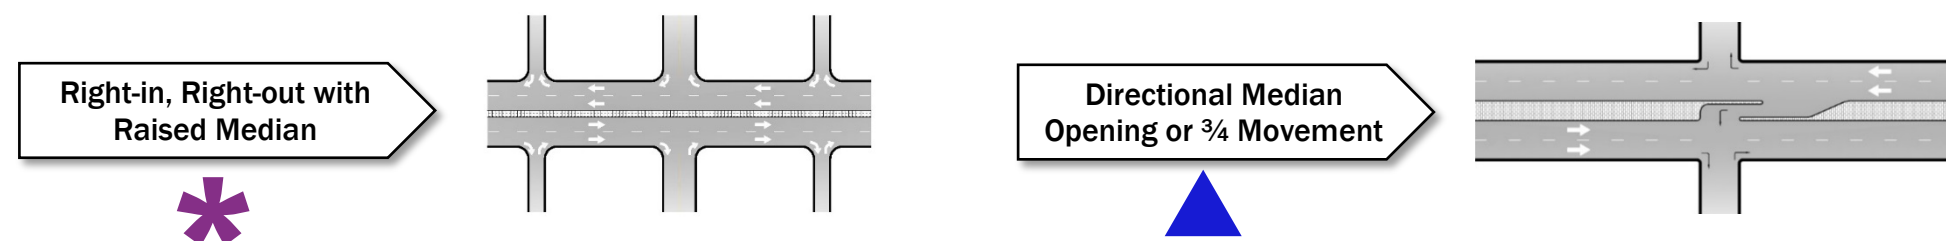

### Locate Signals/Intersections to Provide Efficient Traffic Flow

- Space intersections for efficient signal progression
- Allow for turning movements at predictable locations for smoother traffic flow

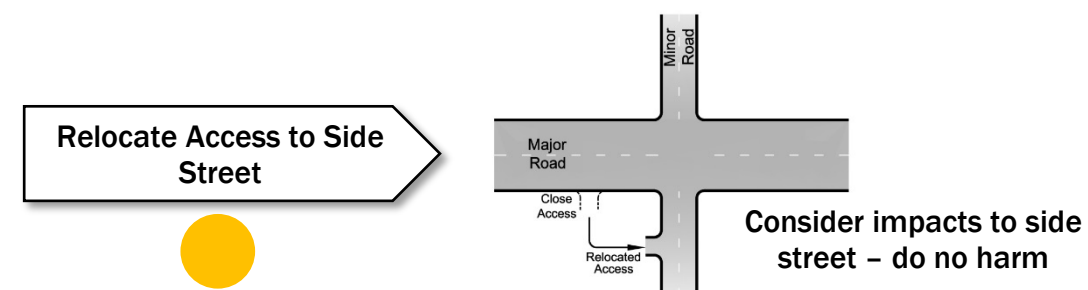

### Remove Turning Vehicles from Through Traffic Lanes

- Provide left- and right-turn lanes, if warranted

### Minimize Locations where Vehicles Merge, Split, or Cross

### Provide a Supporting Street and Circulation System
