

ACCESS CONTROL PLAN IMPLEMENTATION

Cañon City US 50 Access Control Plan

Bulldozers are not coming.

If nothing changes, nothing changes.

The East Cañon Corridor Plan requires implementation of an Access Control Plan.

- Prior to implementation of the Corridor Plan, Access Control will be implemented in the following cases:

Redevelopment that increases traffic by 20% or as required by the City's Site Plan Development Process*

Publicly funded project by the City or CDOT

Development of safety or operational issues

*Possibility of cash-in-lieu in the form of an impact fee at the City's discretion

- If redevelopment occurs prior to the construction of the East Cañon Corridor Plan, access to the frontage road will be consistent with the Access Control Plan.

The plan is a living document that can be *amended*.
